Overview

Fintech companies are revolutionizing the way we pay for goods and services—creating new currencies, improving risk analysis, lowering transaction fees, increasing access to capital, and enhancing cost efficiencies.

Driven by tech innovation and market demand, the sector is brimming with opportunities for investment and growth. Yet challenges abound as the industry grapples with cybercrime, privacy protection, and myriad state and federal financial regulations.

O'Melveny advises early-stage and established fintech companies, their investors, and other stakeholders on corporate, regulatory, and litigation considerations, including:

- Private equity and venture capital financing
- Securities counseling

Accolades

"With its national coverage and depth of expertise, the firm's bet-the-company labor and employment litigation practice is very well known."

Legal 500 US

- Data security and privacy
- Intellectual property
- Anti-money laundering, KYC, and Bank Secrecy Act regulations
- M&A
