Clark, Quinn, Ellis Present Seminar on Accessing European Capital

September 20, 2016

O'Melveny Investment Funds Group partners Tim Clark, Daniel Quinn, and Eve Ellis will present "Accessing European Capital: A Roadmap for US Managers" on the evening of September 20, 2016, in our New York office.

Accessing European capital can be challenging for US fund managers. It has been more than two years since Europe implemented its Alternative Investment Fund Managers Directive, but issues remain, and the landscape has become more uncertain with the UK's decision to leave the European Union.

The presentation is intended to help US fund managers and intermediaries uncover issues—and solutions—around accessing European capital. Topics to be covered include AIFMD (reverse solicitation, soft marketing, green/red light countries, AIFM-hosting, and marketing passports), Brexit, and differences between European and US investors.
